About Hua

Full-stack engineer with 10+ years of experience building real-world web systems, from early CMS platforms to modern data-driven applications.

Specialised in frontend engineering with React and TypeScript, delivering complex UI systems, 3D visualisation platforms (Three.js), and performance-focused applications.

Recently contributed to a large-scale orchard optimisation system for Zespri, building geospatial visualisations and ETL pipelines to support operational decision-making.

Experienced across the full stack (Java, Python, Node.js, C#), with a focus on scalable, maintainable systems. Currently exploring AI and LLM integration in web applications.

Work Experiences

Full Stack Engineer (Data & Geospatial Systems), Zespri International

November 2024 - February 2025 | Bay of Plenty, NZ

- Developed a data-driven orchard sampling system for large-scale operational scheduling across 300+ orchards.
- Built interactive geospatial visualisations using React, Leaflet, and TailwindCSS.
- Integrated OpenRouteService API for route optimisation and multi-stop navigation.
- Designed ETL pipelines using Python and SQLite for processing geospatial data.
- Delivered an end-to-end full-stack system deployed on Azure.

Frontend Engineer (3D & Web Applications), Realibox

August 2021 - February 2023 | GuangZhou, China

- Built and maintained large-scale frontend systems, including SaaS platforms and a range of internal business tools.
- Led internationalisation (i18n) for key products.
- Developed core features for a WebGL-based 3D editor using Three.js.
- Improved rendering performance for large-scale 3D models in browser environments.
- Led frontend refactoring using React, Next.js, and Vite.
- Implemented large file upload systems with chunking and cloud storage.
- Worked on complex interaction logic and state management for 3D scenes.
- Collaborated in an agile, cross-functional team with PMs, QAs, and backend engineers.
- Occasionally served as Scrum Master to drive feature delivery.

Frontend Engineer (WebGL / Interactive Applications), Nuclear Stone Technology

August 2020 - July 2021 | Chongqing, China

- Developed 3D interactive panorama systems for real estate visualisation.
- Built cross-platform web applications using HTML5.
- Integrated multimedia features including video, audio, and scene annotations.
- Implemented social sharing and authentication features via API integrations.

Skills

Frontend
React, Next.js, TypeScript, JavaScript, HTML5, CSS3, MobX

3D & Visualisation
Three.js, WebGL, D3.js, ECharts, Leaflet

Backend & APIs
Node.js, Java (Spring Boot), Python, C#, REST APIs

Data Engineering
ETL pipelines, Apache Airflow, Data Modelling, PostgreSQL, MySQL, Redis

Cloud & DevOps
AWS, Azure, Docker, CI/CD (GitHub Actions, GitLab)

Tools
Git, Linux, Ubuntu, Agile(Scrum/Kanban)

Full Stack Engineer (Data & Visualisation Systems), Enshi Environmental Protection Agency

February 2020 - July 2021 | Enshi, China

- Built a real-time Air Quality Index (AQI) system serving a city of 5 million residents.
- Developed ETL pipelines and RESTful APIs using Spring Boot, MySQL, and Redis.
- Built a public data visualisation platform and admin dashboard using React.
- Implemented CI/CD pipelines and deployed systems to cloud infrastructure (Aliyun Cloud).

Full Stack Engineer (Early Career), Various Companies

2007 - 2016 | Hubei, China

- Delivered 100+ websites and web systems for enterprise and government clients.
- Built CMS platforms, booking systems, and internal business tools.
- Worked across ASP, PHP, .NET, and SQL Server.
- Worked in a small team environment, taking ownership across frontend and backend development.

Education

Master of Applied Data Science (Distinction)

University of Canterbury, Christchurch | 2024 - 2025

Bachelor of Information Technology (Distinction)

Otago Polytechnic, Dunedin | 2017 - 2021

Volunteering

Event Coordinator & Speaker

Chinese IT Association New Zealand, 2023 - Present

- Contributed to organising IT meetups and community events as part of a team.
- Delivered technical talks on data science and software engineering topics.
